

Signaling Lights, Beacons, Marker Light

Eflare Safety Beacons were designed and built to provide the fastest and easiest way to be seen and to be safe!

Intensely bright

Can be seen from over 1 kilometre away without the night vision, point fixation and distance judgement problems associated with strobe and incandescent lights.

Infinitely versatile

Available in a variety of one or two colour light combinations, steady-on or flashing, and in three light intensities. Easily attaches to belts, clothing, vehicles, cones and bollards. Be seen and safe in almost any situation you can think of.

Portable and simple to use

Unit is 210mm tall and weighs only 450gm including batteries, making it easy to carry or stow anywhere, and quick and simple to deploy in any situation. Just twist the lens to turn on or off, and place one or more units around to provide a highly visible warning and safety zone around a person, work area, hazard or accident.

Double the safety

Eflares provide safety by ensuring maximum visibility, but unlike pyrotechnic flares there is no risk of fire or explosion, and there are no toxic fumes or residue.

Extremely robust

Eflares are waterproof, dustproof and will survive a drop from a one metre height onto a concrete surface.

Personnel Marker Light

- USCG approved no. 161.012/2/1
- Bright green light
- Up to 8 hours illumination
- Easy to use
- Nonflammable
- Waterproof
- Floatable
- Lightweight

SL60, Solar Marine Light
